Academic Ceremony and Regalia

PROCESSION

The academic procession is a vestige of medievalism in modern university life. The somber gowns and colorful hoods are similar to those worn by scholars and church men as early as the 12th century. The garb had an element of utility. The robes were warm; the hoods could be drawn up to protect against drafts in unheated buildings.

Traditionally, the hood's silk lining was the color of the university, and the color of the bordering velvet indicated the special area of study, still used today. White represents arts, letters and humanities; dark blue, philosophy; light blue, education; yellow, science; brown, fine arts; mustard, business; purple, law; dark green, medicine; lilac, dentistry; olive, pharmacy; pink, music; orange, engineering; citron, social work; and sea foam, podiatry. The color of the tassels on the "mortar boards" or caps of the candidates for degrees corresponds to the velvet borders of the hoods.

Gowns representing the bachelor's, master's and doctoral degrees vary in style. The bachelor's gown has long pointed sleeves; the master's gown, longer, narrow closed sleeves, which extend below the knees; the doctoral gown, with full bell-shaped sleeves and three bars of velvet, opens in the front with wide velvet bands in either black or the color indicating the area of study.

Stoles and sashes represent a student's affiliation with an organization or group such as student-athletes, study abroad, international, Greek organizations, and other student service or academic organizations.

Cords are worn by students who excel academically and are reserved for Latin Honors, university honors, and other honors programs and honor societies.

The tassel on the mortar board is customarily worn on the right side before the degrees are conferred and shifted to the left at the moment the degrees are awarded.

Leaving the Ceremony

To avoid excessive congestion when leaving the Liacouras Center, guests in sections 102–104 and 112–114 should use the 15th Street exit; guests in sections 105–111 should exit through the Main Lobby onto Broad Street.

To ensure everyone's safety and reduce overcrowding, please refrain from taking photos near the Broad Street exit of the Liacouras Center. Here are alternative locations.

1. Liacouras Walk between Norris Street and Polett Walk;
2. Founder's Garden between 13th Street and Liacouras Walk;
3. Bell Tower on Polett Walk between 12th and 13th streets; and
4. Park Mall between Cecil B. Moore and Montgomery streets.

Honors and Distinction Symbols

*** summa cum laude	+ distinction in major
** magna cum laude	++ distinction in double major
* cum laude	

THE CHAIN OF OFFICE AND THE MEDALLION

The chain of office and the medallion are symbols of the office worn by the president on official and ceremonial occasions. The front of the medallion bears a replica of the official seal of the college, which includes the university's name and date of incorporation, a Greek temple, and the motto "Perseverantia Vincit" (Perseverance Conquers). The back of the medallion bears an image of Temple University founder Russell H. Conwell, along with the words "Knowledge with Honor" and "Wisdom Through Diligence." The chain is imprinted with symbols representing the university's original schools and colleges.

THE MACE

Used only on formal academic occasions, the academic mace symbolizes the authority invested in the president by the school's governing body. The mace is an integral part of the Commencement exercises when students are invested in degrees by the lawful authority of the university. It is carried in procession immediately before the president. The mace serves as a symbol of the academic quest for truth and wisdom and represents the unity and aspirations of the collegial community.

David Boardman

DOCTOR OF HUMANE LETTERS, HONORIS CAUSA

David Boardman is interim provost of Temple University and dean of the Klein College of Media and Communication. A leader in the university community for more than a decade, he has demonstrated a deep commitment to Temple's mission.

As Temple's chief academic officer, Boardman works closely with President Fry, university leadership and faculty to shape the institution's academic strategy and vision. He oversees the university's 17 schools and colleges as well as divisions supporting the academic mission, including faculty affairs, student success, global engagement and strategic planning.

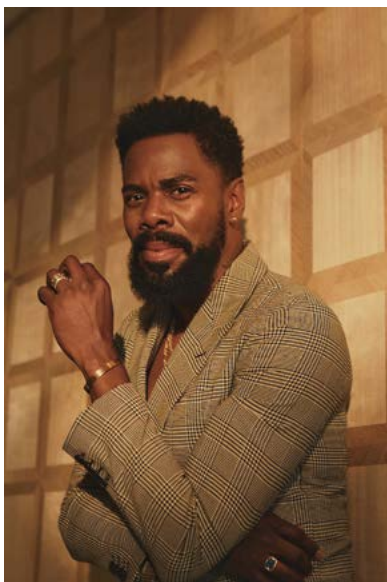

Boardman has served as dean of Klein College since 2013. During his tenure, the college has significantly elevated its national profile, expanded research activity and increased fundraising. Temple University Television (TUTV), a Klein enterprise, was named the nation's best college television station by the

Intercollegiate Broadcasting System in both 2018 and 2022. In 2022, the Association for Education in Journalism and Mass Communication named Boardman Administrator of the Year. He has also served as president of the Accrediting Council for Education in Journalism and Mass Communication.

Before joining Temple, Boardman served as executive editor and senior vice president of The Seattle Times. Under his leadership, the organization won four Pulitzer Prizes and produced 10 finalists. His individual honors include the National Ethics Award from the Society of Professional Journalists, the Goldsmith Prize in Investigative Reporting from Harvard University, the Associated Press Managing Editors Public Service Award and the Investigative Reporters and Editors Award.

Boardman remains active in journalism and civic life. He is founding chair of the Lenfest Institute for Journalism and chairs Spotlight PA. He is immediate past chair of the Reporters Committee for Freedom of the Press and serves on several boards, including the Solutions Journalism Network and the Organized Crime and Corruption Reporting Project.

He has conducted journalism seminars worldwide. Boardman holds degrees from Northwestern University's Medill School of Journalism and the University of Washington and has been inducted into both institutions' halls of fame.

Colman Domingo

DOCTOR OF HUMANE LETTERS, HONORIS CAUSA

Colman Domingo is an Academy Award, BAFTA, Golden Globe, Critics Choice, Independent Spirit, Tony, Laurence Olivier, Drama Desk and Drama League nominee. He has won an Emmy, Astra, AAFCA, NAACP Image, Gotham and Black Reel Award.

On television, Domingo was most recently seen in Netflix’s *The Four Seasons*, for which he received an Emmy nomination, and led the limited series *The Madness*, created by Clement Virgo. In 2024, he voiced Norman Osborn in the Disney+ animated series *Your Friendly Neighborhood Spider-Man*.

On film, Domingo starred in and executive produced *Sing Sing* (dir. Greg Kwedar), earning Academy Award, Golden Globe, Critics Choice and SAG nominations. He also executive produced *It’s What’s Inside*, which premiered at the 2024 Sundance Film Festival and was released by Netflix. In *Rustin*, produced by Netflix and Higher Ground, Domingo portrayed Civil Rights leader Bayard Rustin—earning Oscar, Golden Globe, BAFTA and SAG nominations. That same year, he played “Mister” in Warner Bros.’ *The Color Purple*, which received a SAG Ensemble nomination.

This year, he appeared in season three of *Euphoria* (HBO) and Antoine Fuqua’s *Michael* (Lionsgate), and future projects include Steven Spielberg’s *Disclosure Day* alongside Emily Blunt (Universal, June 12, 2026), season two of *The Four Seasons* and Jaume Collet-Serra’s *An Innocent Girl* (Netflix).

Domingo is widely recognized for his Emmy-winning role as “Ali” in *Euphoria*, and for standout performances in *Zola*, *If Beale Street Could Talk*, *Selma*, *Candyman* and more. With his husband Raúl Domingo, he produces under their Edith Productions banner, including the Pulitzer Prize-winning, Tony-nominated *Fat Ham*, the Oscar-shortlisted animated short *New Moon* and the award-winning *North Star*.

He originated and starred in *The Scottsboro Boys* (Young Vic, West End), *Blood Knot* (Signature Theater) and *Passing Strange* (Broadway, filmed by Spike Lee). He also starred in the first screen adaptation of a Ralph Ellison story for PBS, *King of the Bingo Game*.

Domingo made his British and Australian stage debuts with his solo play *A Boy and His Soul* (Tricycle Theatre, Brisbane Powerhouse), followed by *Wild with Happy* (Public Theater) and *Dot* (Vineyard Theatre, dir. Susan Stroman), now published and widely produced. His play *Lights Out* premiered at New York Theatre Workshop in spring 2025.

As a theater director, Domingo has worked with People’s Light Theatre, Huntington Theatre, Geffen Playhouse, Actors Theatre of Louisville and Berkeley Repertory Theatre. He also appears on Lin-Manuel Miranda’s concept album *Warriors*.

In 2025, Domingo was on the cover of VOGUE and Time Magazine as a “Closer,” one who works to fill the racial equity gap, and was named on the 2024 TIME100 List as one of the 100 most influential people in the world. He was a co-chair of last year’s Met Gala, which raised a record 31 million dollars for the Costume Institute.

JoAnne A. Epps

DOCTOR OF HUMANE LETTERS, HONORIS CAUSA

JoAnne A. Epps was a distinguished scholar, legal educator and university leader whose extraordinary career in higher education was defined by her commitment to access, opportunity and the public good. A trailblazer, she devoted her life to advancing education as a pathway to justice, civic responsibility and social progress.

Born in Philadelphia in May 1951, JoAnne demonstrated leadership early, serving as president of her high school student council, captain of the cheerleading team and graduating with honors. As a teenager, she often accompanied her mother, a Temple University employee, to campus and even secured a cashier position at the university bookstore. These early experiences at Temple planted the foundation for a lifelong relationship with the institution and a calling to service through education.

JoAnne attended Trinity College as a member of its first coeducational class, graduating with distinction. A professor convinced her to consider law, and JoAnne continued her studies at Yale Law School, where she again excelled academically.

After earning her law degree, JoAnne began her career in Los Angeles as a deputy city attorney in 1976. In 1980, she returned to Philadelphia as an assistant U.S. attorney and, five years later, she joined the faculty at Temple University Beasley School of Law. She served as associate dean for academic affairs for nearly two decades before being named dean of the Law School, a role she held for eight years. As dean, she strengthened academic programs, supported student success and championed diversity within legal education. Her compassion and commitment to students led to lifelong friendships with alumni she mentored.

In 2016, JoAnne was appointed executive vice president and provost of Temple University, overseeing academic and student affairs across the institution. In 2023, she made history as Temple's first Black female president. She led with intellect, compassion and moral clarity, reaffirming Temple's mission and values as a public research university.

Throughout her career, JoAnne was a powerful advocate for inclusive excellence and civic responsibility. Her leadership in the community and to the legal profession included service as president of the Pennsylvania Women's Forum, board member of the Committee of Seventy, inaugural chair of the Philadelphia Police Oversight Board, board president of the Defender Association of Philadelphia and chair of Mayor John Street's Task Force on Police Discipline.

JoAnne was the deserving recipient of hundreds of awards and honors, among them the Spirit of Excellence Award from the American Bar Association and the Philadelphia Bar Association's Justice Sonia Sotomayor Diversity Award. She accepted them with dignity, humility and a commitment to ensuring that her successes and achievements empowered and enabled progress for others.

An architect of opportunity and a force for justice, JoAnne A. Epps leaves a legacy of educational leadership, civic engagement and unwavering dedication to equity and service.

Doctor of Philosophy

MAY 2026

Nouf Mubarak Albarakati

Computer & Information Science. *Joint Clustering of Hospitals Based on Their Admission Behavior for Different Diseases Using Network of Networks Data Model.*

John Benjamin Allard

Bioinformatics. *Phylogeny-informed machine learning for comparative genomics.*

Jovan Andjelkovic

Computer & Information Science. *Data Representations in High-Dimensional and Complex Data: Predictive Modeling in Healthcare and Social Media.*

Samantha Boudeau

Bioinformatics. *Genetic Ancestry and Population Health: Elucidating the Relative Role of African Genetic Ancestry in Cancer Genomics and the Broader Implications for Racial Health Disparities in Cancer.*

Henry J. Brown

Mathematics. *On Problems of Noisy Data Fitting and Spectral Measure Recovery.*

Kyle Evan Brunner

Chemistry. *Design, Synthesis, and Structural Elucidation of Spirologomers for Targeted Molecular Recognition.*

Jorge Ignacio Castelli

Physics. *Infrared Regulators in Perturbative Calculations of Generalized Parton Distribution.*

Justin Chang

Chemistry. *Strategies Toward Vicinal Functionality via Carbon-Carbon Bond-Forming Reactions.*

Bryce William Collingwood

Chemistry. *Investigating DNA Remodeling in DNA Mismatch Repair.*

Dassanayake Mudiyansele Dilini

Ruwanthika Dassanayake
Chemistry. *The Role of Solvent-Analyte Interactions in Determining Ionization Probability in Laser Electrospray Mass Spectrometry (LEMS).*

Ning Ding

Chemistry. *Intense Laser Matter Interactions for Explosives Detection and Tunable Spectral Blueshift.*

Shelly Gupta

Computer & Information Science. *Predictive Modeling with Heterogeneous Data Sources.*

Christian Geoffrey Hahn

Computer & Information Science. *Genetic Encoding for Evolving Instincts and Learning in Non-Axiomatic Reasoning Systems.*

Ganesh Khatei

Geoscience. *Soil Moisture Dynamics, Particulate Matter Emissions, and Plant Water Availability in Salt-Affected Soils.*

Hannah Kim

Bioinformatics. *Harnessing Interdisciplinarity in the Investigation of Nucleotide Sequence Evolution.*

Negar Mohammadi Koushki

Computer & Information Science. *Domain Knowledge Assisted Configuration Management and Diagnosis in Data Centers.*

Jiyao Liu

Computer & Information Science. *Distributed Quantum Computing via Enhanced Connectivity.*

Xuanzhang Liu

Computer & Information Science. *Incentive Mechanism Design in Blockchain-Based Federated Learning over Edge Clouds.*

Victoria Nicole Loucks

Chemistry. *Structure-function Relationships of Copper and Molybdenum Complexes.*

Caroline Merheb

Geoscience. *Evaluating Agrivoltaics for Microclimate Regulation and Food-Energy Co-Production in Cities and Small-Scale Farming.*

Michael Brody Mistrot

Chemistry. *Single Crystal X-Ray Diffraction Solutions for Extra-Dimensional, Aperiodic Network Solid Electrolytes & Advanced Structural Determination.*

Rifat Nurun Nabi

Chemistry. *Development of Decarboxylative Strategies Toward the Synthesis of Fluorinated Pharmaceuticals.*

Thi Dung Nguyen

Chemistry. *Toward Accurate Free Energy Calculations in Biomolecular Simulation: Advances in Markov Model Reweighting and Expanded Ensemble Method.*

Shujit Chandra Paul

Chemistry. *Structure-Property Relationships and Application of Molecular Crystal Solid Electrolytes for Next-Generation Metal-Ion Batteries.*

Jonathan Piscitelli

Chemistry. *Investigating Strand-Specific Iterative Nicking in Mismatch Repair.*

Phillip Anthony Reinhardt

Chemistry. *Investigating Plasmonically Driven DNA Denaturation with Single-Molecule Fluorescence Imaging.*

ASM Saem

Chemistry. *Experimental and Computational Investigation of Topoisomerase as a Possible Target of Titanium(IV) Complexes.*

Kyra Lynn Samony

Chemistry. *Pushing the Boundaries of Trifluoroacetylation: Development of Masked Acyl Reagents for the Synthesis of Trifluoromethyl Ketones.*

Jacob Thomas Stahovich

Physics. *All-Optical Quantum Control of Angular Momentum Orientation and High Resolution Spectroscopy of Alkali Dimers.*

Bailey-Alexander Courchene

Trackman
Physics. *Investigating Emergent Interfacial Phenomena in Complex Oxide Heterostructures Using Angle-Resolved Photoelectron Spectroscopy.*

Hannah Verdonk

Bioinformatics. *Developing Codon Model Tools to Improve Detection of Natural Selection.*

Albatool Luwai Wazzan

Computer & Information Science. *Evaluating Interactions and Decision-Making by Annotators and Users in Computer Vision Systems.*

Jacob Woods

Mathematics. *Mathematical Models and Numerical Methods for the Movement and Life Cycle of Invasive Pests Across Multiple Scales.*

Qi Zhang

Computer & Information Science. *Scalable Information Extraction with Large Language Models.*

DECEMBER 2025

Stefani Lynn Cannon

Biology. *From Temperate Invasives to Tropical Natives: Novel Resource Subsidies, Habitat Use, and Niche Differentiation of Lanternflies (Hemiptera: Fulgoridae).*

Joseph Michael Delmar

Physics. *Aspects of Quark and Gluon Structure of the Proton, Pion, and Kaon From Lattice Quantum Chromodynamics.*

Mohammad Erfan Mowlaei

Computer and Information Science. *Enhancing Genomic Data Quality Through Deep Learning Methods.*

Zachary James O'Dell

Chemistry. *All-Optical Characterization of Individual Nanocrystal Properties Using Calcite-Assisted Localization and Kinetics (Clock) Microscopy.*

Brendan Alexander Rowe
Physics. *Molecular Spectroscopy and Quantum Control of Homonuclear Alkali Dimers.*

Cassandra Sedler
Chemistry. *Umpolung Heteroatom Transformations Mediated by Iodine(III) Reagents: Novel Reagent Development and Synthetic Applications.*

Femil Joseph Shajan
Chemistry. *Efforts Toward the Total Synthesis of (-) Bousangine A and the Development of Bioorthogonal Tools for Applications in Chemical Biology.*

Zhengkun Ye
Computer and Information Science. *Passive Sensing and Active Protection: Privacy and Security Challenges in Emerging Virtual Environments and Mobile Systems.*

AUGUST 2025

Rafaa Saleh A Aljurbua
Computer and Information Science. *Graph-Based Approach: Bridging Insights from Structured and Unstructured Data.*

Steven Robert Goold
Chemistry. *The Use of Expanded Ensemble for the Predication of Water – Organic Solvent Partition Coefficients of Small Drug-Like Molecules.*

Peter Isaev
Computer and Information Science. *Non-Axiomatic Reasoning and Causal Explorative System (NARCES), A Hybrid Symbolic Reasoning with Sub-Symbolic Learning for Autonomous Intelligent Agents.*

Leah Catherine Leiner
Mathematics. *An Exploration of Compatibility.*

Chong Li
Bioinformatics. *Integrative Approaches Toward Understanding 3D Genome Organization and Functional Impact of Human Genetic Variation.*

Robert Maloney
Chemistry. *Design, Characterization, and Therapeutic Evaluation of Flexibly-Constrained Stapled Peptides for Breast Cancer and Neuronal Regeneration.*

John Robert Oakley
Mathematics. *The Algebra, Geometry, and Topology of Cusped Mapping Tori.*

Hussain Otudi
Computer and Information Science. *Modeling Infrequent Events by Integrating Noisy Data from Multiple Sources and Applying Machine Learning to Classify and Predict Disruptions.*

Bianca Marie Paranzino
Chemistry. *Polarization-Resolved Optical Microscopy for Nanoparticle Imaging.*

Abdalaziz Hani Abdalaziz Sawwan
Computer and Information Science. *Novel Variations and Applications of Multi-Armed Bandit Learning.*

Avery Selberg
Biology. *From Genes to Traits: A Combined Approach for Detecting Sequence Errors and Convergent Evolution.*

Matthew George Sherwood
Chemistry. *Synthesis and Reactivity of Medium Sized Cycle Ethers: Efforts Towards the Bioinspired Total Synthesis of Heliannuol C and Total Synthesis of Heliannuol A and K.*

Madison Shoraka
Mathematics. *Modeling Reorganization of pCF10-Induced Complex Structures in Enterococcus Faecalis Under Erythromycin Treatment.*

Vivek Trivedy
Computer and Information Science. *Representation Learning for Visual Tasks: A Study of Attention and Information Selection.*

Brandis Nicole Whitfield
Mathematics. *The Geometry of End-Periodic Mapping Tori.*

Marvin Samson, CST '60

DOCTOR OF HUMANE LETTERS, HONORIS CAUSA

Growing up in Philadelphia, Marvin Samson, CST '60, worked hard for every personal triumph. He began working at a very early age delivering papers. As a high school student during the 1950s, he was a drug store clerk, where he earned 50 cents an hour and occasional tips for delivering prescriptions. After graduation, he studied chemistry at Temple University, earning his degree from the College of Science and Technology at night, while working full-time by day at Garde Drug Co., a small firm that developed generic versions of leading over-the-counter medications.

These early experiences set the stage for Mr. Samson to become a leading generic drug entrepreneur with a passion for supporting advances in health care, especially in his own community.

Throughout his career, Mr. Samson helped found and lead several pharmaceutical-related companies including Elkins-Sinn, Inc. (today, Hikma), which he co-founded in 1967 and led as president and CEO for 18 years, growing it into one of the largest generic injectables companies in the United States; Marsam Pharmaceuticals Inc., which he founded in 1985 and sold to Schein Pharmaceuticals in 1995; and Samson Medical Technologies, L.L.C., a company specializing in injectable drug delivery systems for hospital and alternate site pharmacists. He also holds five U.S. patents pertaining to pharmaceutical manufacturing.

Mr. Samson currently dedicates his time and leadership skills to numerous charitable and industry boards. He is a member of the Virtua Board of Trustees, and serves on the boards of NanoPass Technologies Ltd., Flynn Pharma, Avet Pharma, and Frontier Biopharma. Additionally, he is a former member of the boards of Antares Pharma Inc., The Franklin Institute and Cooper Rowan Medical School. He is a past chairman of the Generic Pharmaceutical Association and a past president of the PDE, a pharmaceutical trade association. He also served as Chairman of the Board of Trustees of the University of the Sciences for several years and was its Interim President for the 2011-12 and part of 2014-15 academic years.

In addition to Mr. Samson's expertise in pharmaceuticals, his true passion is to support education and ensure a better future for young people in our communities. Among his philanthropic efforts, he launched the Samson STEM Learning Initiative, an enrichment program of The Franklin Institute that funds science learning opportunities for inner-city middle school children in Philadelphia.

In April 2026, Temple University School of Pharmacy announced the creation of the Samson Scholars Program, created through a \$1 million donation from the Marvin Samson Foundation. The program will provide \$25,000 scholarships to first year Doctor of Pharmacy students who have demonstrated financial need.

To the Class of 2026,

Congratulations and welcome to the Temple University Alumni Association (TUAA)!

Temple Owls are members of an unbreakable supportive community. As you step out into the world, you are not alone. There are more than 380,000 fellow Owls worldwide excited to see you take flight.

Your time at Temple has prepared you to shape your own future. As you prepare to leave the nest, please know that we are here to support you every step of the way. We encourage you to take advantage of the many benefits and resources available to you after graduation, including

- **Alumni Events:** Join us for Homecoming, Temple Made Days, volunteer opportunities and more.
- **Alumni Career Services:** Temple provides support at every stage, for every career, for all alumni. Our Alumni Career Services provide opportunities to expand their educational foundation established at Temple University. Find networking tools, optimize your resume, search for jobs, prep for interviews, connect with other Owls and more.
- **Affinity Networks:** Affinity Networks are alumni groups convened around self-identified personal affinities, common interests and shared university experiences. The Temple University Black Alumni Alliance (TUBAA) and Temple Women's Network (TWN) work to connect their respective constituents to one another and back to the university through events, community service, communication and philanthropy. We're actively building more opportunities to celebrate more affinities.
- **Regional Networks:** Owls are everywhere! There are Temple alumni across the country and across the globe for you to connect with through events and other channels.
- **Temple University Young Alumni:** We have programs, events and resources geared specifically for alumni under 30 years old.
- **Schools and Colleges:** Each school and college has its own alumni association and unique ways to engage its alumni.

Visit **alumni.temple.edu** to learn more about all the resources, information and engagement opportunities—both in person and online—we offer to connect and serve our alumni and university community.

You are a valued member of the Temple Made community, and we wish you the very best of luck as you begin this next phase of your Temple journey.

Go Owls!
